

Center support bearing (VKQA 81000)

Solutions for the automotive industry

More miles and smiles with SKF center support bearing. The right way to improve your fleet productivity and earnings. Get better performance from your trucks with our OE quality products.

SKF has pioneered many innovations in bearing technology for the automotive industry. We have set the world's standard for quality and provided the technology needed for new levels of vehicle performance and reliability. With innovations and developments, SKF helps you move your business and your vehicles forward.

This kit is an assembly of a pre-greased ball bearing (6211) with 2 wiper seals and 2 metal circlips, housed in a metal bonded rubber housing.

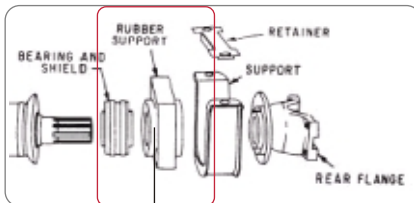

What are the benefits?

Understanding and meeting customer requirement has always been the prime objective of SKF. This kit is designed to reduce overhauling costs and ensuring improved vehicle uptime. Center support bearing has a very critical application in the power transmission to the rear wheels.

It acts a vital link and provides the correct alignment to the propeller shafts. SKF center support bearing ensures that the dimensional tolerances are accurate, to avoid premature failure of the shafts. It enhanced quality gives the vehicle owner and the garages the confidence of a reliable performance of the vehicle.

Product benefits:

Oil seals used are of special grade nitrile rubber, which can withstand high temperatures and provide better sealing. Circlips are made from high performance spring steel. The controlled tolerances and fine grade bearing steel gives un-interrupted performance and longer life. Housing is made of high grade virgin rubber which ensures better damping and ability to withstand shock loads. Center support bearing is a critical part in the under carriage transmission of a truck. Reputed fleet owners and garages ensure that their vehicles are equipped with quality

Application:
Part No. VKQA 81000
Vehicle details Tata Motors CVs

SKF Packaging for Center Support Bearing

SKF products to ensure:

- Confidence and safety: 100% SKF branded, manufactured to the highest quality standards in the world.
- More business: A fully-loaded truck stranded due to a center support bearing failure not only involves higher cost of maintenance but also defaulted commitments and may be even lost customers!
- SKF Center support bearings help you reduce these unplanned maintenance and increase business profitability.

Install confidence, install SKF!
