

Solutions for the automotive industry

# SKF Universal Joint Kits

Universal Joint kits for driveline (propeller shaft) applications specially designed for demanding load conditions. An ideal aftermarket solution for truck owners, looking for OE quality.

SKF UJ kits have been specially designed keeping in mind the exacting needs of Indian transportation industry. SKF India Ltd., has a long standing commitment to the automotive industry in providing robust solutions in the aftermarket. Based on the actual loading pattern and the resultant failure trends, SKF India Ltd. now presents the UJ kits to give that confidence to the truck owners in ensuring reduced maintenance.

With the introduction of the Universal Joint kits, SKF enables commercial vehicle drivelines to experience increased service life, reduced maintenance and reduced vehicle downtime, with following key features:

- Heavy-duty forging of UJ body designed to take torsion stresses.

- High grade steel for roller and bearing cups to withstand extra loads
- Heavy-duty grease for better lubrication and corrosion resistance
- Controlled dimensional tolerances provide perfect fit of UJ body and rollers with the propeller shaft yoke
- Free flow grease galleries and pillar serrations to ensure proper lubrication
- Effective sealing at the cup lip to resist water & dust entry into the UJ body

#### Truckload of benefits :

Top performance heavy duty SKF Universal Joint kits give you benefits by the truckload :

- **One kit convenience** : SKF UJ kits include the UJ body, bearing cup, appropriate circlips and greasing nipple
- **Confidence and safety** : 100% SKF branded, manufactured to the highest quality standards in the world
- **More business** : A fully-loaded truck stranded due to a UJ failure not only involves higher cost of maintenance but also defaulted commitments and may be even lost customers!
- SKF UJ kits help you reduce these unplanned maintenance and increase business profitability

- Reduced Lubrication
- Reduced Inspection Intervals
- Reduced Downtime
